ALVEUS
An expression of taste

Made of stainless steel CrNi 18/10

Made of Algranit

Made of safety glass

Flush mount sink

Undermount sink

Minimum cabinet size 30 cm

Minimum cabinet size 45 cm

Minimum cabinet size 60 cm

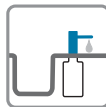

Minimum cabinet size 90 cm

Corner cabinet 90x90 cm of L-shape

Sink bowl with radius 10 mm

Detergent dispenser installation possible

Drainer tray fits main and small sink bowl

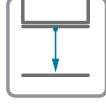

Chopping board slides along drainer surface

Sink bowl volume ≥ 22 l

Normal door turning of kitchen cabinet

Drawer system opening
(supplementation with Fix-set Albio 40)

Made of Granital

Inset sink

Flat (slim) mount sink

Sit-on sink

Minimum cabinet size 40 cm

Minimum cabinet size 50 cm

Minimum cabinet size 80 cm

Corner cabinet 90x90 cm

Made of stainless steel
CrNi 18/10 of thickness $\geq 0,8$ mm

Main bowl depth ≥ 180 mm

Tray fits main and small sink bowl

Strainer bowl fits main and small sink bowl

Sink bowl can be covered by Alveus TriTop and
Alveus BiBoard

Alveus TriTop as additional and
movable sink drainer surface

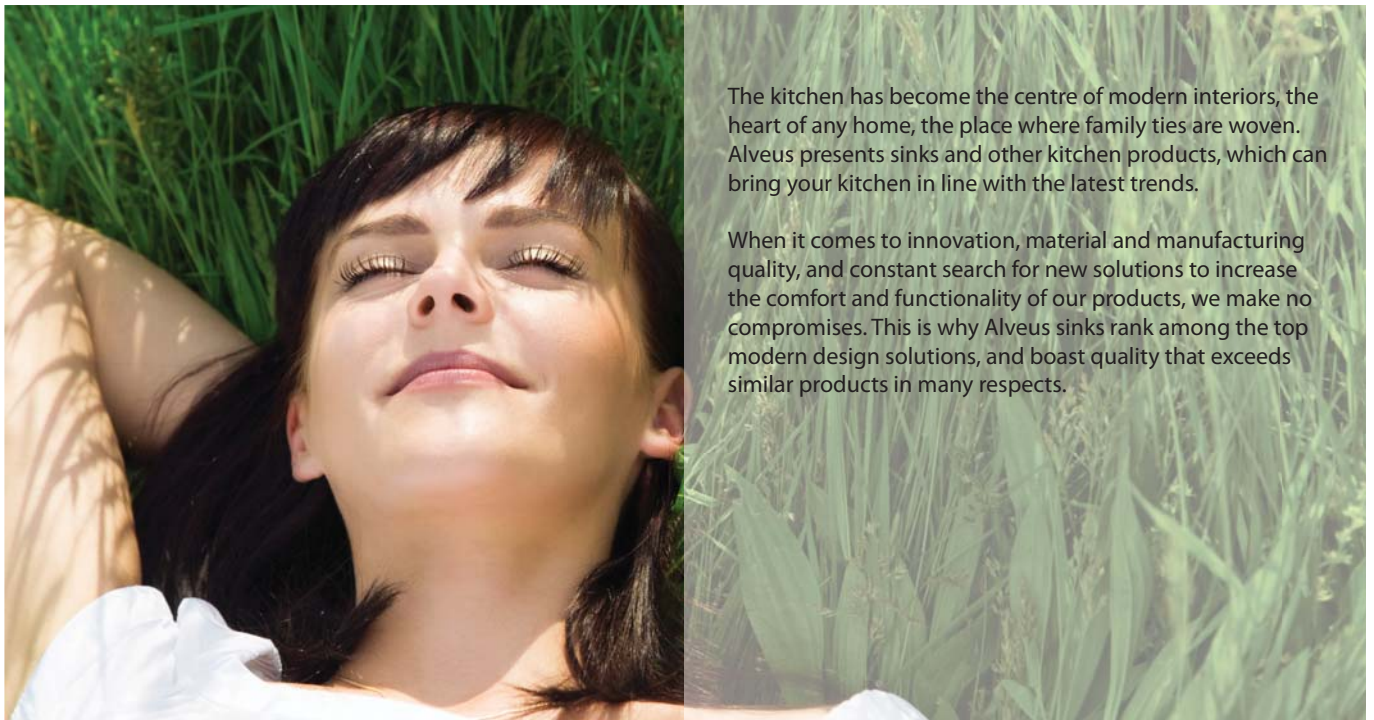

Opening at the same time with door kitchen cabinet
(incompatible with damped closing systems)

Assisted and damped closing (supplementation with
Soft-close Albio 40)

Quality and Innovation

The kitchen has become the centre of modern interiors, the heart of any home, the place where family ties are woven. Alveus presents sinks and other kitchen products, which can bring your kitchen in line with the latest trends.

When it comes to innovation, material and manufacturing quality, and constant search for new solutions to increase the comfort and functionality of our products, we make no compromises. This is why Alveus sinks rank among the top modern design solutions, and boast quality that exceeds similar products in many respects.

Presentation of trademark Alveus

Alveus

The Alveus brand products are designed for modern high-end kitchens. In today's interiors, the boundaries between the kitchen and living area are becoming blurred, while minimalist, refined and sophisticated design solutions have begun to gain ground.

With their large, clean surfaces and innovative approach to space use, Alveus sinks perfectly match the latest furniture and architectural ideas. They are made for kitchens just like that, as their outstanding design and functional qualities exceed the existing standards in many ways.

The carefully designed solutions will enhance your food preparation and kitchen work efficiency. Alveus sinks are manufactured from top-quality modern materials, which ensures easy and environment-friendly maintenance and decomposition.

About manufacturer

Kovinoplastika Lož from Slovenia is one of the largest and most successful European suppliers of kitchen sinks and related equipment, which boasts a 60-year tradition. It is an international company, which has earned its enviable position in the kitchen equipment market by pursuing the highest quality standards, keeping pace with modern design trends, and being a flexible and reliable business partner.

Due to its products, which boast not only outstanding quality but also an excellent quality/price ratio, Kovinoplastika Lož is quickly and effectively strengthening its market positions in Slovenia as well as in other European countries.

The Alveus brand sinks are available in many markets seven of which are controlled successfully by Kovinoplastika Lož through its subsidiaries and the rest through long-term successful partnerships with local companies.

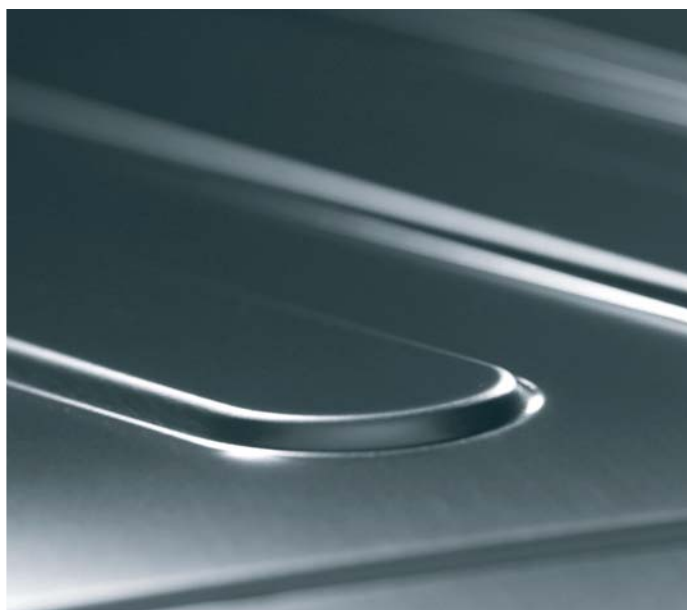

Apart from manufacturing and marketing the Alveus brand products, Kovinoplastika Lož successfully manages the production programmes of other own brands, among which the building hardware and joinery brands stand out.

Gastronorm programme is designed for use in the catering and hotel industries and in canteens. Kovinoplastika Lož has a long tradition in cooperating with europeans most important companies in field of components.

As Kovinoplastika Lož is one of the most important centres of manufacturing knowledge in the region, the company also boasts a long tradition of successful tool manufacturing service marketing and sophisticated tool and machine manufacture and marketing.

Great advantages

Modern kitchens are flexible, well designed, and increasingly freed from the traditional division into the cooking, work and wash-up areas. With state-of-the-art sinks, the Alveus brand promotes innovative and functional kitchen solutions, which transcend the limits of the “wet” kitchen area. Alveus sinks are thus becoming an important part of everyday life, and are designed and manufactured accordingly, displaying the four most significant qualities that place Alveus sinks among the top products in the market.

Sturdiness

Alveus sinks rank among the most durable sinks in the market since they are manufactured from 18/10 stainless steel up to 1 mm in thickness. The main advantage of thicker steel are greater impact resistance, increased stability of a sink tap and significantly reduced level of water splashing noise. In weight comparison, sinks made of thicker stainless steel are heavier.

Granite composite sinks are composed of granite parts tightly bound with high quality acrylic resin, which helps to acquire excellent mechanical properties and chemical persistence. Some Alveus finished goods are made of tempered glass, a type of safety glass with significantly increased toughness and thermal resistance.

Handiness

Alveus sink bowls can be deeper than other products of the sort. The capacity of the sink is thus increased by up to a few litres, which makes the task of washing up large pieces and big amounts of dishes much more comfortable.

The sinks use 1^{1/2}" or 3^{1/2}" drain plumbing (depending on the model), which allows quick drainage of large amounts of water.

Health and Environment Friendliness

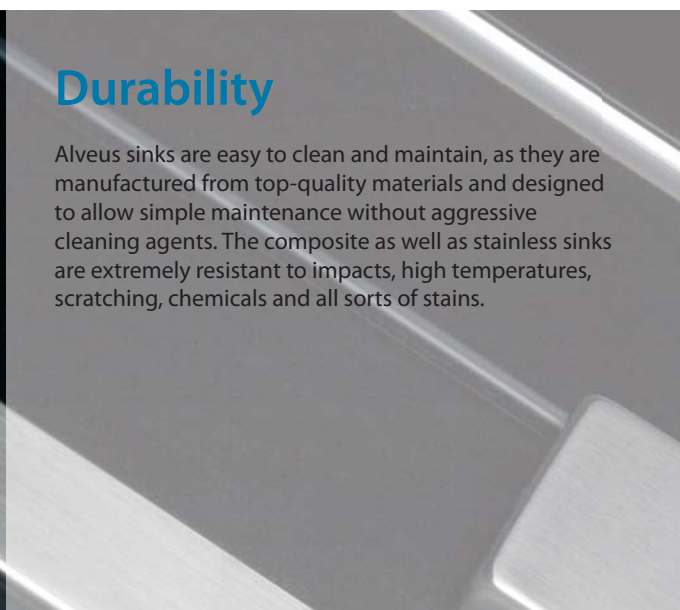

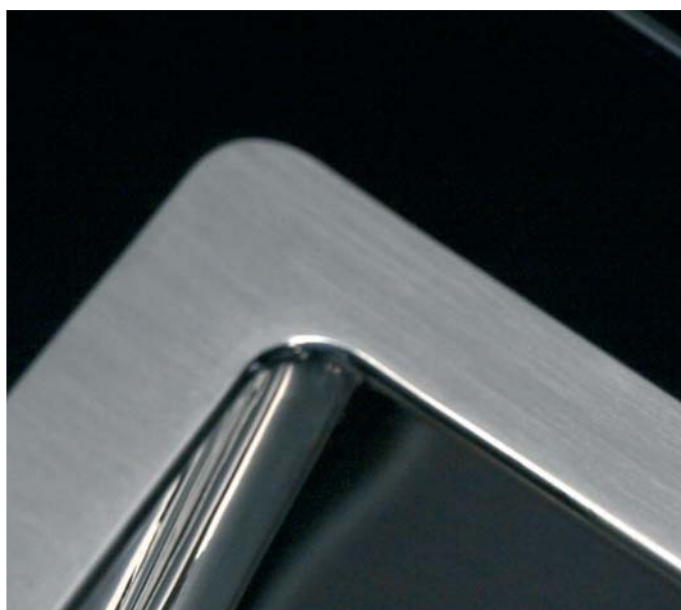

Alveus sinks are surface treated to resist the growth of mould, microorganisms and bacteria. All surfaces are easy to clean, as the sinks have no inaccessible spots for bits of food and other grime to accumulate.

In addition, Alveus sinks are environmentally friendly, containing no harmful admixtures that might be released into the environment upon decomposition.

Durability

Alveus sinks are easy to clean and maintain, as they are manufactured from top-quality materials and designed to allow simple maintenance without aggressive cleaning agents. The composite as well as stainless sinks are extremely resistant to impacts, high temperatures, scratching, chemicals and all sorts of stains.

Selection Guide

When buying a kitchen sink it is recommendable to, consider the following:

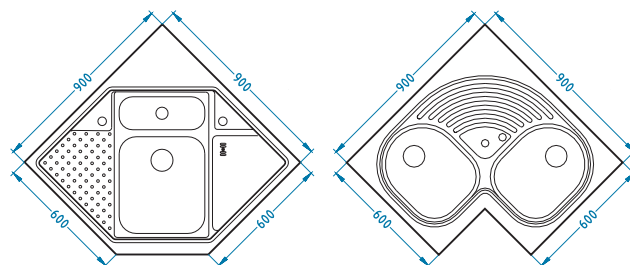

Cabinet width – first of all, you must know the size/width of the sink cabinet, which has influence on your choice.

Our sinks are classified according to the minimum required cabinet width, namely 400, 450, 500, 600, 800, 900 and 1000 mm plus 900x900 mm corner cabinet. Smaller kitchen sinks can be accommodated by larger cabinets, but never vice versa. For instance, a sink dimensioned to fit a cabinet of 400 mm minimum width can also be installed into any cabinet exceeding the designated size.

Sink orientation – once you have determined the cabinet width, you have to determine orientation of the sink on the kitchen worktop. You can choose among left-hand, right-hand and reversible sink designs. Most of sinks are reversible, you need not to worry about the orientation upon your purchase, as you can turn the sink with its main bowl(s) according to your needs.

In the next step, you can **choose among various materials** (stainless steel or composite material), **various installation types** (inset, flush mount, flat mount, undermount or sit-on) and, **various sink designs**.

Installation corner types:

Configurations

Alveus kitchen sinks come in various orientations to adjust perfectly to your kitchen requirements. To make your decision easier, every sink presentation in this catalogue includes a list of available varieties.

left-hand	main bowl on the left, drainer on the right
right-hand	large bowl on the right, drainer on the left
reversible	any arrangement possible; bowl on the left or on the right
corner	can be installed into corner cabinets (some models also into regular cabinets, depending on model dimensions).

Installation Types

Alveus sinks are suitable for various installation types, thus adjusting completely to design and architectural requirements of your kitchen.

Inset sinks are installed into kitchen worktop, thus forming part of continuous working surface. Sink is inserted from above into a suitable worktop cut-out and fastened with supplied clamps.

I

Flush mount sinks are installed into previously adjusted kitchen worktop made of waterproof material (natural stone, composite material, glass, impregnated solid wood). Surface of the sink and surface of the worktop are in the same level. The main advantage is seamless working surface that enables very easy cleaning and an attractive appearance.

F

Flat mount sink are installed into kitchen worktop so that a uniform working surface is created. Thin, almost unnoticeable rims allow quick and easy cleaning. An additional advantage is simple installation from above into each type of kitchen worktop.

S

Undermount sinks are installed into kitchen worktop from below. Worktop must be made of waterproof material, such as natural stone and composite material. This type of installation enables various combinations of undermount bowls in different sizes. Absence of seams between sink and worktop contributes to simple hygiene maintenance and overall appeal of a kitchen.

U

Sit-on sinks assume the function of kitchen worktop by replacing it on top of a kitchen cabinet. They either “sit” at the end of a worktop or connect two worktop ends (one on each side). Alveus Sit-on Sinks normally have a rear wall rim of 30 mm, however there are a few versions without it (please see individual sinks description). The sinks can be installed in combination with standard worktops of 30 mm thickness.

Fully Equipped

Accessories

With suitable accessories, such as strainer bowls, chopping boards, detergent dispenser, trays and covers Alveus sinks turn practically into complete small kitchens, furnished for the most delicious activities. The majority of sinks have the most important and most interesting accessories included in the basic package, which is clearly marked in this catalogue. The rest of the accessories are available to order.

Waste Kits and Pop-Up System

Most sinks come with suitable waste system traps in order to facilitate the installation process. Certain sinks are supplied with pop-up system, which allow remote operation of the drain stopper. This is very practical for the moments when we wish to close an waste or empty the water out of a full sink without getting our hands wet.

Seals

Most of the sinks are fitted with top-quality Alvoflex seals already attached to the undersides of their outer rims. This is permanent fixation that enables faster and easier installation, and prevents water leakage under the sink rim to kitchen worktop and cabinet.

Sound-Deadening Undercoating

As a contrast to some competing products, all Alveus stainless sinks are serially fitted with special sound-deadening undercoating. This undercoating mitigates the noise from water splashing upon hitting the sink surface, and thus successfully increases the comfort of working and living.

Mounting Accessories

The type of fastening accessories depends on installation type of sinks and kitchen worktop material.

There are suitable accessories available for each type of sink installation - I (inset), F (flush), S (flat) or U (undermount). For I, F and S installation method, there are optimum number of fastening clips enclosed with each sink, suitable for mounting into worktops of 30 to 40 mm thickness. For worktops of non-standard thickness up to 65 mm, specially designed clips can be supplied.

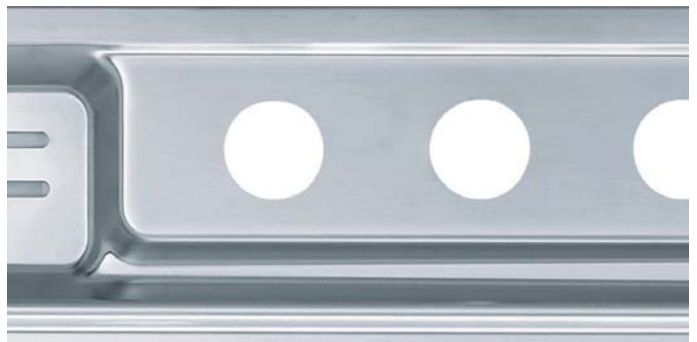

Undermount Sink Fittings

The undermount sinks can be supplied with special fastening accessories, designed to suit installation method as well as type of worktop material.

Factory-Made Cut-Outs

Assembly of additional elements Alveus is very simple, as the orifices for kitchen fittings and eventual other equipment (pop-up waste or detergent dispenser) are mostly prepared already in production. Thus, there is no need to bother with the risky business of cutting out the precisely located holes yourself.

Overflow

Alveus sinks are designed in a way that the excess water does not remain on the level surfaces, but is drained either through the central drain or overflow. The overflow is an opening on the bowl wall or drainer surface, which prevents water from spilling over the sink in case the waste drain is blocked. The overflow is thus a kind of a safety device in your kitchen.

Top-Quality Materials

Alveus kitchen sinks are available in several materials, surface finishes and colours. Apart from the stainless steel sinks in three finishes (SAT- Satin, LEI - Leinen and MLEI - Microleinen), our offer includes selected models from high-quality composite material Algranit. In the wide range of Algranit colours, you will certainly find the one that will blend into your kitchen or create with the kitchen a beautiful contrast.

Premium Stainless Steel

The main characteristics and advantages of 18/10 stainless steel are:

- Easy cleaning which ensures a high level of hygiene
- Resistance to high temperatures and rapid temperature changes (thermal shock)
- Resistance to impacts
- Resistance to chemical influences
- 100 % recyclability

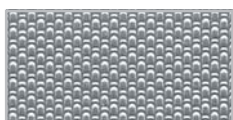

The stainless steel (CrNi) thickness ranges from 0.5 mm to 1.0 mm depending on the price range of the sink.

Surface finishes

The difference between the finishes is mainly reflected in the appearance and partly in the scratch resistance. While the SAT finish produces a polished, easy-to-clean stainless steel surface the LEI and MLEI finishes produce a matte texture, which is less sensitive to tiny scratches, but requires a bit more care. The technical characteristics of the basic material are the same in all varieties; however, certain sinks are not always available in all three finishes.

SAT (Satin)

LEI (Leinen)

MLEI (Microleinen)

Special surface treatment of stainless steel

A thin vaporised metal substance known as ceramic nitride is deposited onto stainless steel surface, resulting in:

- unique metal lustre,
- superior scratch resistance,
- extremely hard-wearing protective surface.

The surface-treated stainless steel is available in three precious metal colour shades - GOLD, COPPER and ANTHRACITE.

Due to the nature of surface treatment process, each sink ends up with unique colour shade.

COPPER

GOLD

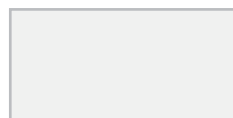

ANTHRACITE

Tempered Glass

Tempered glass is a safety glass with emphasis on toughness and thermal resistance. There are two available colours- black and white, which will bring uncompromising elegance and style into every kitchen.

Colour range

white

black

Algranit Composite Material

Kitchen sinks from composite material ALGRANIT contain of granite particles bound together by high-quality polymer resin to achieve excellent sturdiness and resistance to high temperatures.

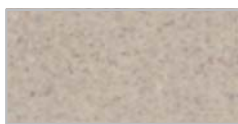

The sinks boast excellent resistance to scratches and impacts, while their smooth surface ensures easy cleaning; dirt, stains, scale and even accidentally spilt chemicals can be removed effortlessly. Increased material sturdiness and cleaning in accordance with the instructions guarantee a long service life to these sinks.

Colour range

The Algranit material is available in a wide range of colours, some of which are added a metallic lustre. The colour will not fade with time, as the material is not sensitive to UV ray

A57 - espresso-metallic

Granital Composite Material

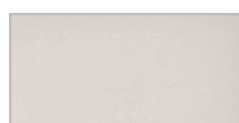

Granital composite material is a mixture of 75-80% granite particles bound together by high-quality binder, which provides strength and flexibility to a kitchen sink as well as the resistance to temperature shocks.

Careful surface treatment makes kitchen sink smooth and pleasant to the touch. The smoothness of the surface provides an easy cleaning of the kitchen sink.

Sinks manufactured from material Granital are resistant to impact, scratches and after many years of use they retain their original tone and texture.

G55 - beige

G91 - carbon

Care and Maintenance

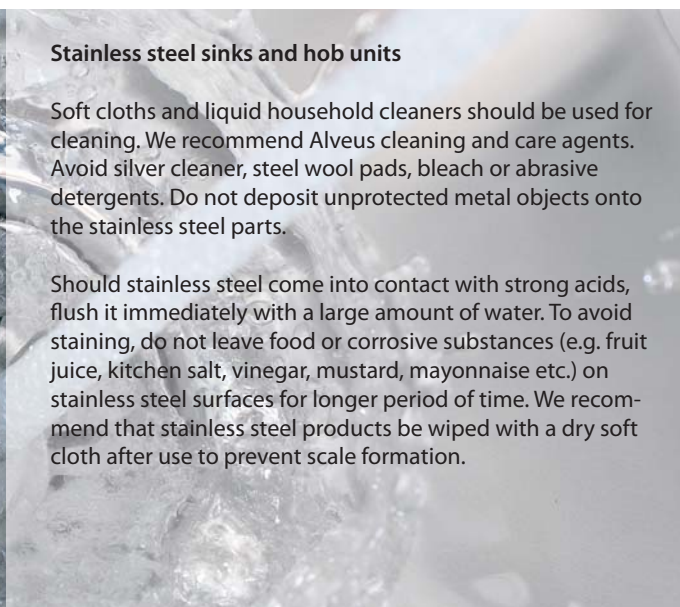

The products united under the Alveus brand are first-rate products in terms of quality, manufacture, materials and design. Since the sinks are made of various materials with specific characteristics, care and maintenance must be adjusted accordingly. Every sink is supplied with care and maintenance instructions. Following the recommendations stated, you will ensure a long service life to your Alveus kitchen products.

Stainless steel sinks and hob units

Soft cloths and liquid household cleaners should be used for cleaning. We recommend Alveus cleaning and care agents. Avoid silver cleaner, steel wool pads, bleach or abrasive detergents. Do not deposit unprotected metal objects onto the stainless steel parts.

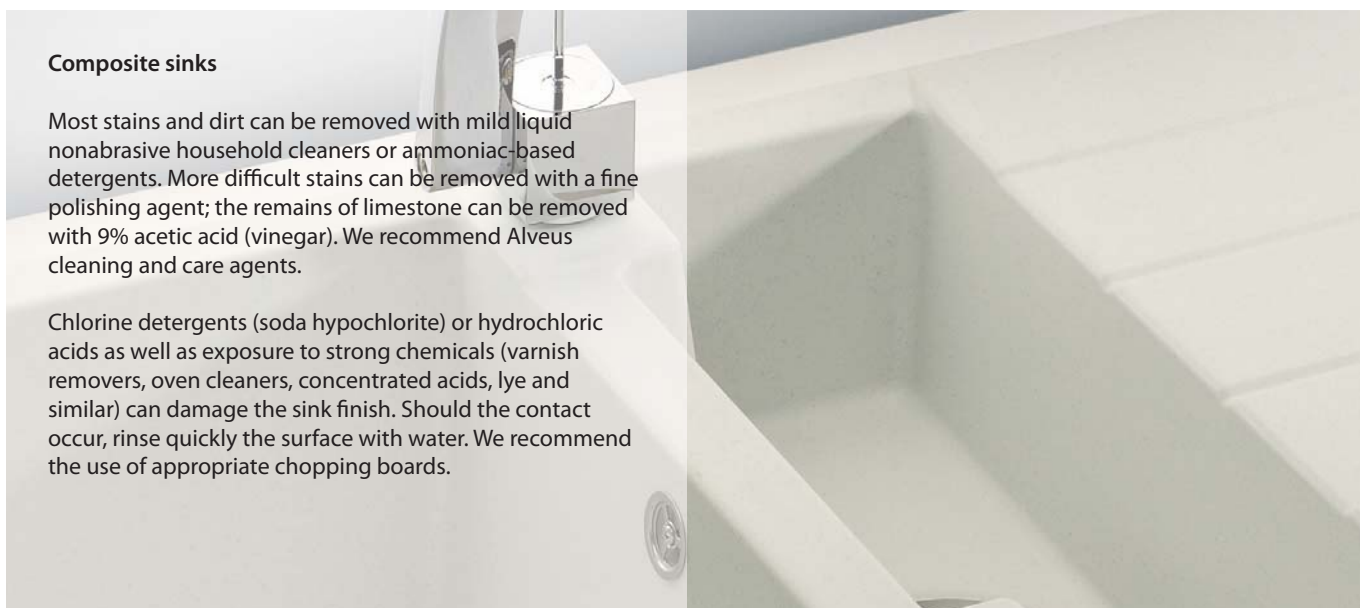

Should stainless steel come into contact with strong acids, flush it immediately with a large amount of water. To avoid staining, do not leave food or corrosive substances (e.g. fruit juice, kitchen salt, vinegar, mustard, mayonnaise etc.) on stainless steel surfaces for longer period of time. We recommend that stainless steel products be wiped with a dry soft cloth after use to prevent scale formation.

Composite sinks

Most stains and dirt can be removed with mild liquid nonabrasive household cleaners or ammoniac-based detergents. More difficult stains can be removed with a fine polishing agent; the remains of limestone can be removed with 9% acetic acid (vinegar). We recommend Alveus cleaning and care agents.

Chlorine detergents (soda hypochlorite) or hydrochloric acids as well as exposure to strong chemicals (varnish removers, oven cleaners, concentrated acids, lye and similar) can damage the sink finish. Should the contact occur, rinse quickly the surface with water. We recommend the use of appropriate chopping boards.

Kitchen taps

For cleaning of Alveus kitchen fittings it is best to use a soft cloth, hot water and liquid detergent for kitchen sinks. Should scale build up on the tap, remove it with 9 % acetic acid.

Silver cleaners, steel wool pads, bleach or abrasive detergents can damage the tap finish, so they should be avoided. Chlorine detergents (soda hypochlorite) or hydrochloric acid can have a similar effect.

Waste segregation bin systems

Waste segregation systems are designed to allow for the most convenient removal of kitchen waste from the work surfaces. Apart from mixed binning, the systems enable separate binning of different kinds of biological and non-biological waste. Due to various container sizes and large total capacity, they fit any home.

ALVEUS

Modern kitchens are becoming an increasingly important part of the living area, where people spend quality time, preparing food and socialising. At the same time, they tend to connect with other rooms so the boundaries between the living area and kitchen have disappeared almost completely.

Large, clean, modern surfaces require sinks that fit perfectly into the cutting-edge kitchen-living environments, while still performing up to the most demanding of gourmet tasks. Alveus sinks are designed for these very kitchens, as their outstanding design and functional qualities surpass the existent standards in many a way.

Stylux

The kitchen has grown into focal point of modern interiors, becoming the heart of family life and a place where the most important family ties are woven. ALVEUS will warm your heart with STYLUX, the new family of kitchen sinks, which belongs to the very top of contemporary design solutions. You can choose amongst seven fabulous sink models of different dimensions that are built from CrNi 18/10 grade stainless steel in 1 mm thickness, and enhanced by a wide range of innovative and stylish accessories. Let the family ties be woven with ALVEUS...

Basic characteristic of Stylux sinks are small radiuses (10 mm); in combination with a 200 mm bowl depth, these provide a significantly increased sink bowl capacity. With their accomplished detail and precise finish, the Stylux sinks will impress even the most demanding user.

The unique shape provides Alveus safety glass **BiBoard** with two functions – a mobile drainer or a sink cover.

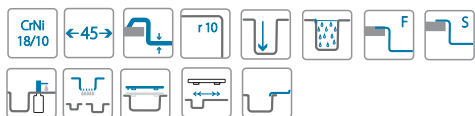

Accessory range will fascinate you with its innovative technique. With their accomplished detail and precise finish, the Stylux sinks will impress even the most demanding user.

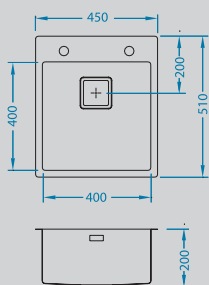

TriTop's two different sizes in stainless steel enable in various combinations three additional uses- increase of working surface, additional mobile drainer and sink covering.

Crystalix Glassix

With kitchen sinks of the Crystalix and Glassix family, your creativity will bring elegance to your home. They are made for the most demanding users, who require not only uncompromising quality, but also cutting-edge design. The sinks are available in different models and two colours- white and black. They are manufactured from premium stainless steel of above-average thickness and 10 mm thick tempered safety glass.

Tempered safety glass improves the mechanical properties of the glass by greatly increasing its toughness. Therefore, Crystalix and Glassix sinks are very compact and tough despite their modern appearance.

Extremely small radiuses in combination with above-average depth create additional space for more comfortable sink use.

Recognizable attributes of Glassix sinks are round waste outlet and soft bowl shape.

The distinctive character of Crystalix sinks is complemented by a matching glass cutting board, square strainer bowl and quadratic waste.

Quadrix

The Quadrix sinks allow great creative freedom in the kitchen. With clean shapes and a touch of the latest trends, they are designed for the most demanding users. The line comprises different models of various dimensions, which can be combined in any way you choose. The sinks are manufactured from high-quality stainless steel of above-average thickness. Their basic characteristic are small radiuses (10 mm); in combination with a 200 mm bowl depth, these provide a significantly increased sink bowl capacity.

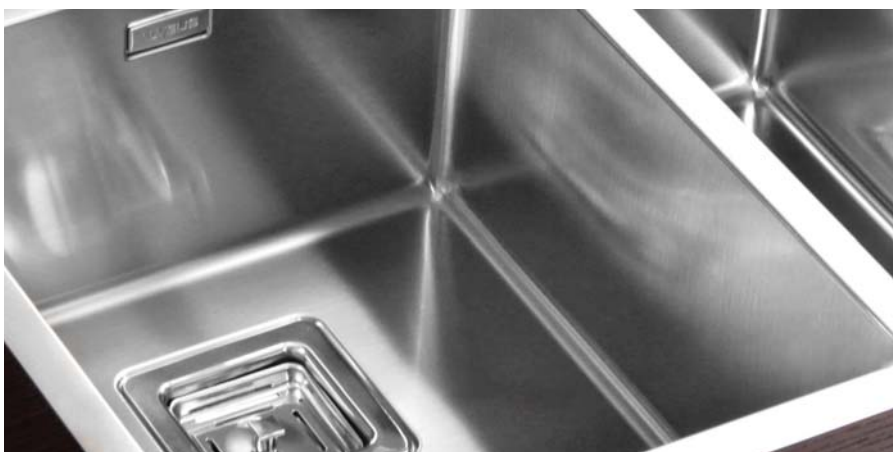

With undermount installation, the worktop covers sink rim, which significantly increases the work surface. Quadrix sinks are also available in the flash and flat mount varieties. Some typical bowl configurations are shown at the end of the presentation to make your decision easier.

The basic characteristic of Quadrix sinks is their 10 mm radius, which adds an unconditional elegance of select contours.

The unique and distinctive character of Quadrix sinks can be complemented by a matching pop-up waste button and kitchen tap.

Square waste outlet is available according to special order.

Monarch Collection

Every kitchen deserves a wonderful sink. The Alveus brand of sinks has had a new addition to its product range – the Monarch Collection. These sinks come in three stunning colour shades – GOLD, COPPER and ANTHRACITE. These precious stainless steel colours will add unique sparkle to your kitchen. The metal lustre of Monarch Collection sinks will add a touch of mystique to your kitchen.

Due to special surface treatment technology each sink ends up with unique colour shade. The attractiveness and functionality are supplemented by the accessories such as wooden or glass chopping board and stainless steel strainer bowl in the sink colour. Sinks from the Monarch Collection can be complemented by the taps Alveus from Monarch or standard (chrome plated) product range.

The large wooden chopping board slides freely along the entire sink surface.

The strainer bowl and drainer tray can be placed into the large or small sink bowl.

Stainless steel strainer bowls, trays and some kitchen taps are available in the sink colour shade.

Vision

Vision sinks are actually small kitchens, brimming with new ideas. Their design is suited to the requirements of modern cooks expecting maximum functionality and assistance. Large bowls and drainer make washing up and draining easy. A special feature is an additional drain area with own drain, where you can keep your sponge or pour liquid waste. The entire sink is designed so as to channel all drained-off water towards the drain, and its usability is enhanced by the adjustable drain flow function.

Vision sinks are manufactured from durable stainless steel of above-average thickness, which ensures rigidity and a long service life. The rims are shaped to allow easy cleaning and a high level of hygiene. The overall attractiveness and functionality of the sinks are complemented by the supplied accessories (wooden chopping board, stainless Strainer bowl and waste pop-up).

Sliding along the entire sink length, the walnut chopping board provides maximum adjustability, while the Strainer bowl fits into the large or small sink bowl. Made of stainless steel, the Strainer bowl is dishwasherproof.

The large chopping board from walnut hardwood slides freely along the entire sink surface.

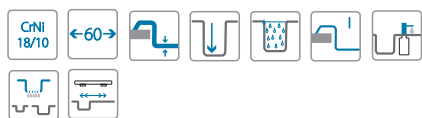

The Strainer bowl can be placed into the large or small sink bowl.

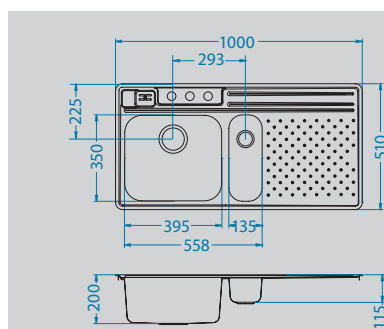

Due to the additional drain area with own drain, all drained-off water is channelled towards the drain, which ensures hygienic and effective washing.

Algranit

Cubo

Futur

Lux

Cubo, Futur and Lux kitchen sinks are made of high-quality Algranit composite material in various colours. Deep sink bowls (large bowl depth up to 230 mm small bowl depth up to 150 mm) ensure a high level of functionality, and in combination with the stylish small radiuses result in a significantly increased capacity. Sinks are of straight lines and a smooth surface, which allow easy cleaning and hygiene maintenance. The accessories perfectly matching the sink shape will also be of assistance in the kitchen. The neat beach wood chopping board is carefully designed and extremely functional.

Apart from the wooden board, the sink can be complemented with stainless steel strainer bowl. You can choose between the shallower and the deeper one, and use it for draining washed cups, glasses, vegetables or for peeling fruit.

Cubo sinks have been designed in contemporary and minimalist style.

The distinguishable feature of Futur sinks is their rounded shape.

The small radii of Lux range together with their exceptional bowl depth ensure noticeable increase of usable washing-up space.

Granital

Granital sinks are made of high quality composite material Granital. Due to the careful processing of the material, the surface of kitchen sinks Granital is smooth, which allows easy cleaning. The line of kitchen sinks Granital comprises a wide and interesting range of eleven models. You can choose different shapes and bowl sizes, number of the bowls and even between various designs of drainer surface.

The colour palette of eight models consists of five shades, as three models are available in two colours - beige and carbon.

Eleven different models in five warm colors.

Granital kitchen sink in arctic and carbon colour can be combined with sink mixers in the same colour.

The smooth surface of the kitchen sink is pleasant to the touch and with everyday tasks easy to clean.

Praktik

The modern lines of the Praktik sinks bring a touch of aesthetics and functionality into the kitchen. They boast exceptional depth and sink bowl size, which makes kitchen work so much easier. The Praktik family consists of different models. You can thus choose among sinks with various numbers of bowls, with or without drainer surface and of various dimensions and shapes.

The models are reversible and can be installed either as right-hand or left-hand bowl sinks. The wide range of accessories provides exceptional functionality and work-surface use.

The generous bowl depth gives Praktik sinks bigger capacity and more comfortable washing-up of bigger size or larger quantities of dishes.

The unique design of the drainer adds a special character to the Praktik range.

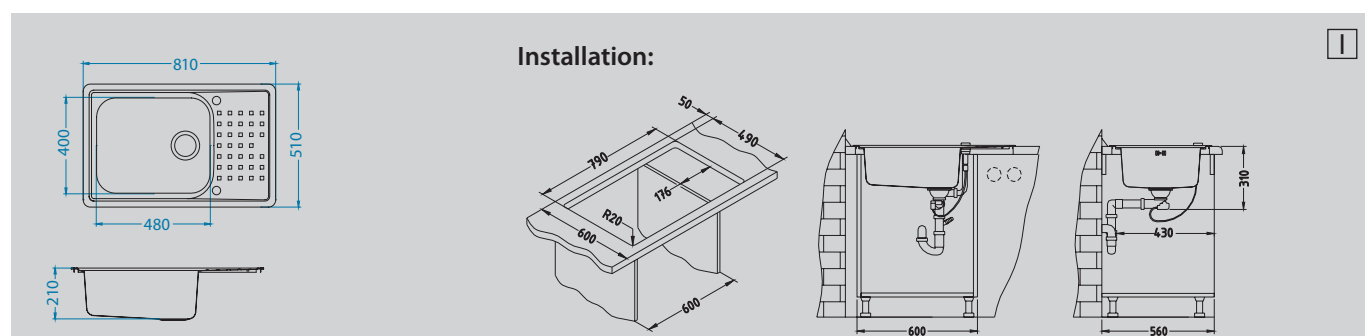

Thicker and more solid material provides better impact resistance, improves stability of tap and significantly reduces the running water noise.

Line Maxim

Line Maxim sink family of modern design and clean lines offers innovative and functional solutions and transcends the limits of “wet” kitchen area. Owing to the variegated and numerous accessories Line Maxim sinks make work in the kitchen so much easier. The functional washing-up and food preparation solutions are designed for the most demanding users. Namely, there is a wide array of available accessories- a stainless steel strainer bowl (colander) and tray, a glass chopping board, a pop-up waste system, as well as the large chopping board that can either slides along the entire sink or suits to the main sink bowl.

The Line Maxim sinks are made of quality stainless steel and come in different surface finishes. The sinks boast above average bowl depths. The majority of models are of FS type, which means they can be installed as flush mount or as flat mount sink.

Line is the basic design element, symbolising the movement of water.

The large cutting board slides smoothly across the bowl and drainer surface even when colander is inserted into the bowls.

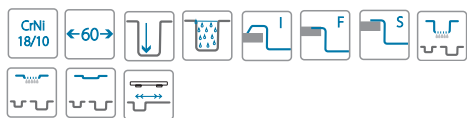

All accessory items can be used on the main as well on the small bowl, which is a refreshing novelty.

Line

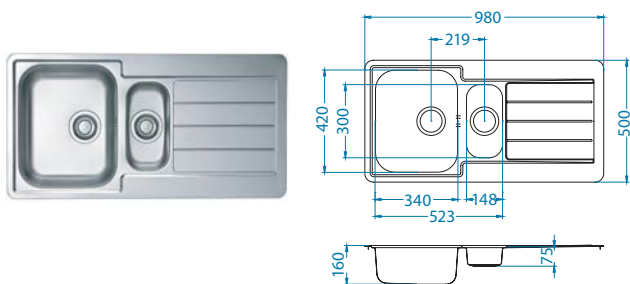

With their varied and large range of accessories, Line sinks make work in the kitchen so much easier. The functional washing-up and food preparation solutions, typical of high-end sinks and designed for the most demanding users, are now available at reasonable prices.

Various combinations of accessories can be put together and fully adjusted to individual needs. Line sinks are manufactured from quality stainless steel and come in two surface finishes.

Zoom

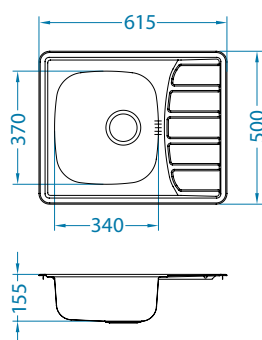

Kitchen sinks ZOOM are a great compromise of design and basic dimensions. Sinks are suitable for the kitchen cabinet of minimum width 45 cm. Depending on your needs and capabilities of your kitchen you can choose between three dimensions of temporarily designed draining surface.

Kitchen sink ZOOM can be refined with additional functions by adding a wooden chopping board, a strainer basket and detergent dispenser.

KITCHEN WASTE AND PLUMBING KITS

Alveus waste kits are an integral part of every kitchen sink. Plastic parts are made of environment polymer materials, while the metal ones are stainless. Along with the appurtenant gaskets these form an effective used water drain system.

The waste kits fit to Alveus sinks and enable connection of dishwasher drain hose. The well-designed construction of Alveus waste kits allows easy cleaning and maintenance as well as better space utilisation in the sink cabinet.

- Wastes come in standard size of 1½" (strainer diameter 70 mm) and 3½" (strainer diameter 114 mm)
- Sink bowl drains can be closed by means of plugs or pull-out stainless steel strainer basket furnished with gasket
- Pop-up system enables mechanical drain control by means of a button located on the sink edge
- Overflow form is rectangular with different drain position (PP, HV and HPV)

KITCHEN MIXER TAPS

Alveus kitchen mixer taps are technologically sophisticated and come in various shapes to complement traditional as well as trendy kitchens. The numerous varieties with regard to installation, operation and surface finishes allow an abundance of combinations.

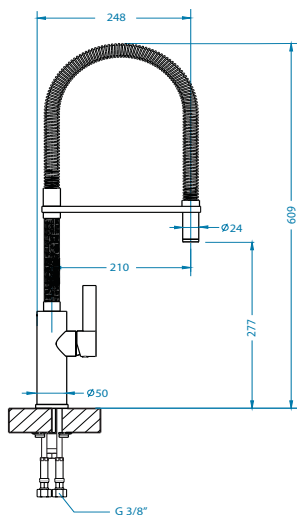

- Ceramic discs and metal handles ensure reliable operation and long service life
- Surface finish can be polished chrome, Algranit colour range and ceramic nitride (PVD-treatment) in three shiny colours (Gold, Copper, Anthracite)
- Taps can operate with water pressure from 0,5 to 8 bar (recommended 1 to 5 bar)
- Taps are of swivel body or swivel spout
- Several models are fitted with pull-out spout and spray function
- Taps can be installed on the sink or kitchen worktop
- Some models have movable spout, which is convenient for under - window installation
- Two flexible hoses with 3/8" connections ensure simple and fast installation to dual (hot-cold) water supply system
- Models with mark -  - are equipped with three connection hoses and can operate only with cold water supply, delivering hot water instantaneously on demand by means of un-pressurised water heater (usually electric boiler)

WASTE SEGREGATION BIN SYSTEMS

Waste segregation bin systems Albio are designed to enable the most convenient removal of kitchen waste from the working surfaces. It is possible binning of different kinds of biological and non-biological waste. Due to various bin sizes and large total capacity, Albio systems fit any home.

- Metal guides and stable construction enable binning up to 60 litres of waste
- The systems are intended for quick and easy mounting onto the cabinet bottom
- The systems are designed to prevent unpleasant odours from escaping
- Depends on the model there are systems with one, two or three waste bins
- The bins are made of environment friendly polymer materials, which are easy to clean and recyclable
- The built-in handles allow easy handling and stable insertion of trash bags
- System Albio 30 enables opening at the same time with door cabinet
- System Albio 40 can be turned to a drawer system with normal or assisted and damped closing by means of optional accessories

KITCHEN ACCESSORIES

Alveus dispensers of liquid detergents enable simply assembly in the kitchen. They are suitable for installation on the sinks and in all kinds of kitchen worktops of thickness up to 45 mm.

The use of dispenser is very simple, for by pressing its upper part by one hand a required quantity of liquid detergent or liquid soap can be hygienically and optimally applied to a washing sponge. Pull out of the upper part enables easy refill of dispenser from above. Maximum content of each dispenser is 500 ml. The amount can be quickly checked due to transparent material of the dispenser container.

Alveus cutlery trays fit 500 mm long kitchen drawers in kitchen cabinets of standard sizes 400, 450, 600 and 900 mm. The trays are easy to cut in order to fit perfectly the drawer. They are made of polypropylene, an environment friendly polymer material that fulfils also hygienic requirements for coming into contact with foodstuff.

Alveus Allshine is universal cleaning agent for kitchen sinks made of stainless steel and composite material Algranit. It is also suitable for removal of persistent stains as well as limescale.
